

Accessibility and Inclusion

The **Faculty of Exact and Natural Sciences at the University of Buenos Aires** is committed to providing an accessible and inclusive environment for all participants. The conference facilities offer accessibility features designed to facilitate participation and mobility.

Mobility Access

Hearing Support

In particular, the **Aula Magna**, the main conference hall, is equipped with facilities to support participants with hearing impairments, helping to ensure an inclusive and comfortable experience during scientific sessions.

We are committed to making the **XVII ELAFOT and 3rd LatASP Meeting** accessible to all attendees. Participants requiring specific accommodations are encouraged to contact the Organizing Committee in advance so that we can provide the appropriate support whenever possible.
